Homework 1: B topology
For MATRICOLA 1605178 to $+\infty$

10.0.2.0/24

10.0.2.3/24

PC3

eth0: 10.0.2.1/24
eth1: 10.0.10.2/24

r2

10.0.10.0/24

eth0: 10.0.0.1/24
eth1: 10.0.1.1/24
eth2: 10.0.10.1/24

r1

10.0.0.0/24

10.0.1.0/24

PC1

PC2

10.0.0.100/24

10.0.1.100/24
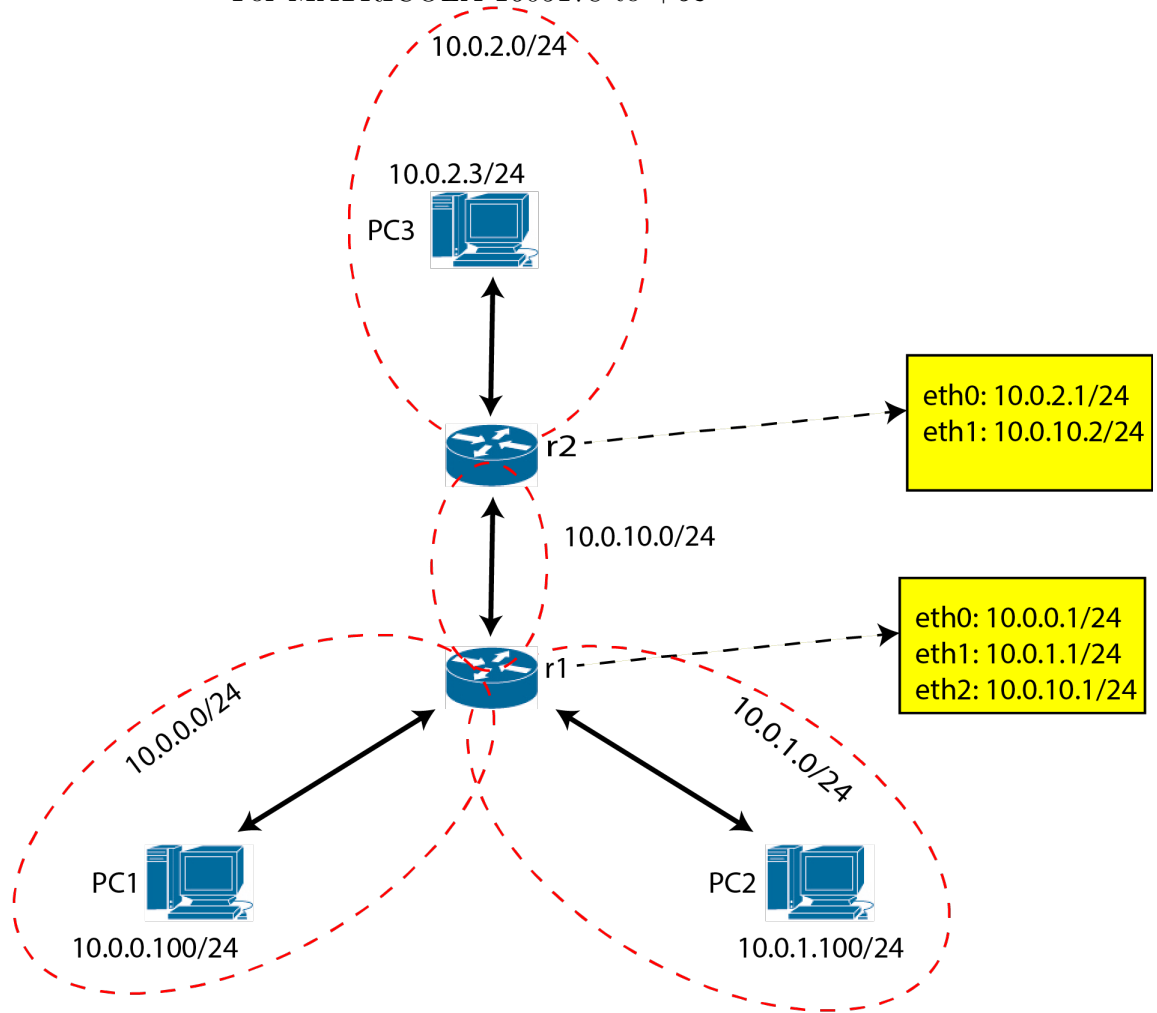

Given the topology in figure, recreate it in netkit allowing every host to communicate with the other. You must use the VM names and addresses specified in the figure above. Points are assigned as follows:

- 2 points: only folders created

- 4 points: only folders and lab.conf created

- 7 points: configuration via startup scripts

- 10 points: configuration via /etc/network/interfaces
